

PROCEEDINGS OF THE 5th EUROPEAN CONFERENCE ON PRODUCT AND PROCESS  
MODELLING IN THE AEC INDUSTRY – ECPPM 2004, 8–10 SEPTEMBER 2004,  
ISTANBUL, TURKEY

# eWork and eBusiness in Architecture, Engineering and Construction

*Edited by*

Attila Dikbas,

*Istanbul Technical University, Turkey*

Raimar Scherer

*University of Technology, Dresden, Germany*

A.A. BALKEMA PUBLISHERS LEIDEN / LONDON / NEW YORK / PHILADELPHIA / SINGAPORE

# Table of contents

*Preface*

*Organisation*

## ***Keynote Papers***

The future forces of change for the construction sector - A global perspective

*R. Flanagan*

Vectors, Visions and Values

*P. Brandon*

Help wanted: project information officer

*T. M. Froese*

The next generation of e-business and eWork - What is needed for the systemic innovation? An executive summary of the EU supporting research and innovation.

*B. Salmelin*

## ***Product Modelling Technology***

Virtual building maintenance: Enhancing building maintenance using 3D-GIS and 3D laser scanner (VR) technology

*V. Ahmed, Y. Arayici, A. Hamilton, G. Aouad*

Supporting standard data model mappings

*R. Amor*

Virtual building environments (VBE) – Applying information modeling to buildings

*V. Bazjanac*

A persistence interface for versioned object models

*D. G. Beer, B. Firmenich, T. Richter, K. Beucke*

Semantic parameterized interpretation: A new software architecture for conceptual design systems

*A. Eir*

Harmonization of ISO 12006-2 and IFC – A necessary step towards interoperability

*A. Ekholm*

A novel Modelling Approach for the exchange of CAD information in civil engineering

*B. Firmenich*

Integration of product models with document-based information

*T.M. Froese*

Aligning IFC with the emerging ISO10303 modular architecture -  
Can AEC community take advantages from it?

*R. Goncalves, F. Farinha, A. Steiger-Garcao*

84

Optimisation of project processing in steel construction domain

*E. Holtzhauer, H. Saal*

Location sensing for self-updating building models

*O. Icoglu, A. Mahdavi*

Modeling cast in place concrete construction alternatives with 4D CAD

*R. Jongeling, T. Olofsson, M. Emborg*

Pilot implementation of a requirements model

*A. Kiviniemi, M. Fischer*

A combined product-process model for building systems control

*A. Mahdavi*

FIDE: XML-based data model for the spanish AEC sector

*J.M. Molina, M. Martinez*

A framework for concurrent structure analysis in building industry

*A. Niggel, R. Romberg, E. Rank, R.-P. Mundani, H.-J. Bungartz*

IFC supported distributed, dynamic & extensible construction products  
information models

*M. Nour, K. Beucke*

Product definition in collaborative building design and manufacturing environment

*H. Oumeziane, J.C. Bocquet, P. Deshayes*

Implementation of the ICT in the Slovenian AEC sector

*T. Pazlar, M. Dolenc, J. Duhovnik*

Adding sense to building modelling for code certification and advanced simulation

*I.A. Santos, F. Farinha, F. Hernández-Rodríguez, G. Bravo-Aranda*

Towards engineering on the grid

*Z. Turk, M. Dolenc, J. Nabrzyski, P. Katranuschkov, E. Balaton, R. Balder, M. Hannus*

Managing long transactions in model server based collaboration

*M. Weise, P. Katranuschkov, R. J. Scherer*

A software generation process for user-centered dynamic building system models

*G. Zimmermann & A. Metzger*

### ***Process Modeling Technology***

Embedded commissioning for building design

*O. Akin, M.T. Turkaslan-Bulbul, I. Gursel, J.H. Garrett Jr., B. Akin, H. Wang*

The development of a technical office organization structure for enhancing  
performance and productivity in fast track construction Projects

*T.A.H. Barakat, A.R.J. Dainty, D.J. Edwards*

Innovative production planning system for bespoke precast concrete products

*V. Benjaoran, N. Dawood, Marasini*

Process and information flow in mass customisation of multi-story housing  
*T. Olofsson, L. Stehn, E. Cassel-Engquist*

RoadSim: An integrated simulation system for road construction management  
*S. Castro, N. Dawood*

Connet Turkey – Gateway to construction in Europe  
*A. Dikbas, S. Durusoy, H. Yaman, L. Tanacan, E. Tas*

Modelling collaborative processes for virtual organisations in the building industry  
*M. Keller, P. Katranuschkov, K. Menzel*

Process modelling in building engineering  
*M. König, A. Klinger, V. Berkhahn*

Space competition on construction sites assignment and quantification  
utilising 4D space planning tools  
*Z. Mallasi, N. Dawood*

Project Planning: A Novel approach through a universal e-Engineering hub –  
a case study of seismic risk analysis  
*G. Augenbroe, Z. Ren, C. J. Anumba, T. M. Hassan, M. Mangini,*

A decision support model for material supply management for the electrical  
construction industry  
*J. Perdomo, W Thabet, R. Badinelli*

Modeling processes and processing product model information based on  
Petri Nets  
*U. Rueppel, U. F. Meissner, S. Greb*

A building material information system:  
BMIS – In the Context of CONNET – Turkey Project  
*E. Tas, L. Tanacan, H. Yaman, A. Dikbas*

## ***Ontologies***

Managing changes in the AEC Industry - How Can ontologies help?  
*Q.Y. Cai, F.F Ng*

An ontology-driven approach for monitoring collaborative design knowledge  
*Y-C. Lai, M. Carlsen*

Setting up the open semantic infrastructure for the construction sector in Europe –  
the FUNSIEC project  
*C. Lima, B. Fiès, C. Ferreira da Silva, S. Barresi*

Practical use of the semantic web: lessons learned and opportunities found  
*R. van Rees, W. van Vegchel, F. Tolman*

Supporting ontology management through self-describing concepts  
*T. E. El-Diraby*

## ***eWork and eBusiness***

An assessment methodology for e-Business and e-Commerce in the AEC sector

*A. Grilo, P. Malo, R. Jardim-Gonçalves*

The digital dormer – Applying for building permits online

*J.P van Leeuwen, J. Jessurun, E. de Wit*

An inquiry into building product information acquisition and processing

*A. Mahdavi, G. Suter, S. Häusler, S. Kernstock*

Usefulness and ease-of-use assessment of a project management tool for the construction industry

*B. Otjacques, G. Barrère, F. Feltz, M. Naaranoja*

Development and implementation of a functional architecture for an e-Engineering hub in construction

*Z. Ren, C.J. Anumba, T. M. Hassan, G. Augenbroe*

Legal and contractual issues – Are they considered in RTD achievements

*M. A. Shelbourn, T. M. Hassan, C. D. Carter*

Modeling of ERP system solutions for the construction industry

*M. O. Tatari, B-Y Ryoo, M. J. Skibniewski*

Construction informatics themes in the framework 5 programme

*Z. Turk*

## ***Collaborative Working***

Virtual pools of resources eliminate idle or missing equipment in AEC companies

*G. Antoniadis, K. Menzel*

DIVERCITY: Distributed virtual workspace for enhancing communication and collaboration within the construction industry

*Y. Arayici, G. Aouad*

Cooperation and product modelling Systems

*S. Blokpoel, R. P. M. Jongeling, T. Olofsson*

Linking early design decisions across multiple disciplines

*R. Drogemuller, J. Crawford, S. Egan*

State of the art of the implementation of information management systems in the construction industry in Spain

*N. Forcada, M. Casals, X. Roca*

Agent-enabled peer-to-peer infrastructure for cross-company teamwork

*A. Gehre, P. Katranuschkov, R. J. Scherer*

Virtual communities: Design for collaboration and knowledge creation

*I. Kondratova, I. Goldfarb*

The design framework –

A web environment for collaborative design in the building industry

*M. Huhn*

Collaborative work practices in Turkey, Five Case Studies

*A. Sanal*

Architecture for collaborative business process management –  
enabling dynamic collaboration

*S. Zang, O. Adam, A. Hofer, C. Hammer, M. Jerrentrup, S. Leinenbach*

Comprehensive information exchange for the construction industry

*J. Diaz*

### ***Mobile Computing***

Mapping site processes for the introduction of mobile IT

*S.L. Bowden, A. Dorr, A. Thorpe, C. J. Anumba*

Mobile field data entry for concrete quality control information

*I. L. Kondratova*

Issues of context-sensitivity in mobile computing:  
Restrictions and challenges in the construction sector

*K. Menzel, K. Eisenblätter, M. Keller*

A context based communication system for construction

*D. Rebolj, A. Magdic, N. C. Babic*

MOBIKO - Mobile cooperation in the construction industry  
based on wireless technology

*R. Steinmann*

### ***Knowledge Management***

Support for requirement traceability in design computing:

An integrated approach with building data modeling

*I. Özkaya, Ö. Akin*

Interlinking unstructured text information with model-based project data:

An approach to product model based information mining

*S.E. Schapke, R.J. Scherer*

Live capture and reuse of project knowledge in construction: A Proposed Strategy

*C.E. Udejaja, J. M. Kamara, P.M. Carrillo, C. J. Anumba, N. Bouchlaghem, H. Tan*

Development of product family structure for high-rise residential buildings  
using industry foundation classes

*T. Wallmark, M. M. Tseng*

### ***Construction Site and Project Management***

Assistance to building construction coordination by images.

*S. Kubicki, G. Halin, J.-C. Bignon*

Gesprecons: E-Safety and risk prevention in the construction sector

*J. M. Molina, M. Martinez, I. Garcia*

Intelligent construction sites (ICSs)

*T. Mills, Y. Jung, W. Thabet*

Organizational point of view for the use information technology in construction projects  
*P. Praper*

Virtual reality at the building site: Investigating how the VR model is experienced and its practical applicability  
*S. Woksepp, O. Tullberg, T. Olofsson*

Evaluating competitiveness in construction industry: An alternative frame  
*A.Y. Toprakli, A. Dikbas, Y. Sey*

### ***Seismic Risk and Environmental Management***

Analyses of Izmit Earthquake by means of remotely sensed data:  
A case study, Yalova City  
*S. Kaya, F. Bektas, C. Goksel, E. Sarolu*

Do phased environmental management systems actually benefit SMEs?  
*L. L. Hopkinson, C. Snow*

Software based knowledge integration for seismic risk management  
*R. Pellegrini, P. Salvaneschi*

Real-time earthquake prediction algorithms  
*S. Radeva, R. J. Scherer, D. Radev*

### ***IT Supported Architectural Design***

Hybrid approach to solve space planning problems in building services  
*G. Bi, B. Medjdoub*

A computational architectural design approach based on fractals at early design phases  
*Ö. Ediz, G. Cagdas*

APSYS architectural plan layout generator by exhaustive search  
*B. Kisacikoglu, G. Cagdas*

Architectural parametric design and mass customization  
*S. Boer, K. Oosterhuis*

A model for hierarchical floorplan geometries based on shape functions  
*G. Zimmermann, G. Suter*

### ***E-Learning and Education***

Parametric representation of functional building elements with reference to architectural education  
*M. Aygün, I. Cetiner*

Life long learning for improved product and process modeling support  
*P. Christiansson*

E-Learning with puzzle collages  
*C-H Lin, T-W Chang, L-C Yang, S-C. Chen*
